SUMMARY

Computer Science graduate (Bachelor's degree, 2025) with hands-on experience building and deploying full stack web applications using Python, JavaScript, SQL, and MongoDB. Proficient in RESTful API development, database design, object-oriented programming, and end-to-end software development using Git and GitHub version control. Includes a live production e-commerce platform, a dual-login application evaluated on 50+ resumes, and an NLP pipeline processing 1000+ tweets. Focused on writing clean, maintainable, and scalable code across the full SDLC using Agile/Scrum methodology.

SKILLS

Programming Languages: Java, Python, JavaScript, HTML, CSS, SQL

Frameworks & Libraries: Flask, Node.js, REST APIs

Databases: MySQL, PostgreSQL, MongoDB

Cloud & Tools: AWS, Netlify, Render, Cloudflare, Git, GitHub, Postman

Core Competencies: Object-Oriented Programming, Data Structures & Algorithms, RESTful APIs, CRUD Operations, SDLC, Agile/Scrum, Debugging, Responsive Web Design, Problem Solving, CI/CD

PROJECTS

Smart Resume: Analysis & Shortlisting | Python, Flask, ML, MongoDB, RESTful API

- Built a dual-login full stack web application for 2 user types (recruiters and job seekers) to automate end-to-end resume screening and hiring workflows using Python, Flask, and MongoDB.
- Applied ML models via RESTful API endpoints to evaluate ATS scores, rank candidates against job descriptions, and generate improvement suggestions tested across 50+ resumes.
- Implemented CSV export with visual analytics dashboards, reducing manual shortlisting effort and supporting faster, data-driven hiring decisions.

Padmavathi Fruits E-Commerce Platform | HTML, CSS, JavaScript, Node.js, MongoDB, Netlify, Cloudflare

- Engineered a 4-module production e-commerce web application (product browsing, cart, checkout, admin panel) with full CRUD operations, server-side price validation, pincode-based delivery fees, and route-level rate limiting.
- Deployed to live production serving real traffic with responsive web design, Cloudflare CDN caching, Nodemailer email notifications, and a GPS-based delivery location picker.

Twitter Data Analysis Tool | Python, NLTK, MongoDB, HTML, CSS, JavaScript

- Designed a live tweet streaming and NLP-based sentiment analysis platform for 3 user groups (businesses, researchers, content creators) processing 1000+ tweets using Python, NLTK, and MongoDB.
- Delivered an interactive HTML/CSS/JavaScript dashboard visualizing public sentiment, brand perception, and trending keyword engagement in real time.

Restaurant Management System | Java, MySQL, Eclipse

- Developed a full stack Java and MySQL application to digitize restaurant ordering and billing workflows, applying object-oriented programming and CRUD operations to eliminate paper-based processes.
- Implemented contactless ordering, live digital billing, and an admin control panel allowing real-time menu and order management with PreparedStatement-based SQL queries.

WORK EXPERIENCE

Java Fullstack Intern, AI Variant Aug 2025 – Jan 2026

- Completed a 6-month Java full stack internship developing web application features using Core Java, OOPs principles, Spring Boot, Node.js, JavaScript, HTML, CSS, and SQL across multiple Agile/Scrum sprints.
- Built and maintained RESTful backend services with Spring Boot and Node.js, integrated SQL databases, and collaborated on code reviews applying Git and GitHub version control throughout the SDLC.

Android Developer Intern, AICTE x Google Virtual Internship Jul 2024 – Sep 2024

- Completed a 3-month Android application development program covering Kotlin/Java fundamentals, object-oriented programming, UI design, and mobile development as part of Google's structured curriculum.
- Built and tested multiple sample Android applications applying core mobile software development concepts under mentor-guided code reviews.

EDUCATION

SR University, Warangal, Telangana, India 2021 – 2025

Bachelor's degree in Computer Science Engineering — CGPA: 7.71/10

SR Junior College, Telangana, India 2019 – 2021

MPC Intermediate — 73.6%

CERTIFICATIONS

Full Stack Developer (EXCELR) | IBM Data Analytics (IBM SkillsBuild) | DevOps on AWS (AWS Academy) | Computer Graphics & Animations (Infosys Springboard) | Mobile Application Development (Infosys Springboard)
